an extra charge (request basis but not
guaranteed)*

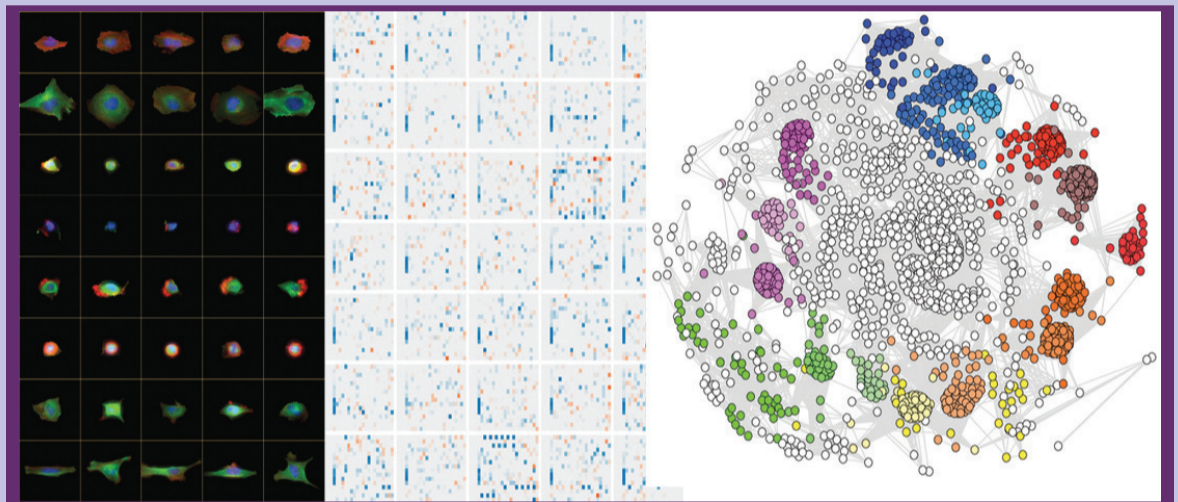

*Participants are responsible for their
own travel arrangements and
expenses.*

The programme for this event
was reviewed and approved by
the EMBO Courses & Workshops
Committee.

High-throughput RNAi & Data Analysis

June 27 - July 2 | 2010 | EMBL ATC | Heidelberg

The EMBO Practical Course will provide training in performing RNA interference (RNAi) screening experiments and in their data analysis.

The focus will be on high-throughput RNAi screening methods in human and *Drosophila* cells and on the associated methods for data analysis.

The course will be a mix of lectures on all aspects of high-throughput RNAi analysis, hands-on training in the setup of screening experiments and practical computer labs on data analysis and interpretation.
